Research Associate – Upstream Process Development

Applied Genetic Technologies Corporation (AGTC) is a clinical stage biotechnology company dedicated to developing novel gene therapies for ophthalmic and respiratory-based diseases. AGTC is aggressively expanding and seeks a full-time Research Associate – Upstream Process Development for its Alachua, FL headquarters.

Reporting Relationship:

- The Research Associate will report directly to the Assistant Director, Upstream Process Development.

Responsibilities:

Job responsibilities will include, but are not limited to, the following.

- Execute, and troubleshoot experiments for the optimization of upstream process steps in flasks and bioreactors for approved research plans
- Perform regular mammalian cell culture (adherent and suspension) and virus production activities.
- Assist in process validation activities
- Collect, analyze, record, and summarize data in the course of biologics production and processing
- Assist in maintaining laboratory supplies and equipment
- Prepare and/or assist in the preparation of written and electronic materials and results
- Observe and comply with AGTC's Employee manual
- Observe and comply with AGTC's Safety and Quality manual
- Knowledge of laboratory safety, OSHA policies, and EPA standards

Requirements:

The successful candidate will meet the following requirements.

- B.S. degree in a relevant area of specialization with 2 to 4 years of experience in a process development environment focused on biologics.
- Course work in biology, biochemistry, applicable to mammalian cell culture
- Advance proficiency in basic biological laboratory techniques, including mammalian cell culture.
- Experience with Bioreactor system preferred.
- Hands-on laboratory experience in cell culture, virology, or related areas.

AGTC offers a competitive compensation commensurate with education and experience, including salary, benefits, and company equity. AGTC is an EOE and maintains a drug-free workplace. Please send CV or resume to
