Research Assistant – Upstream Process Development

Applied Genetic Technologies Corporation (AGTC) is a clinical stage biotechnology company dedicated to developing novel gene therapies for ophthalmic and respiratory-based diseases. AGTC is aggressively expanding and seeks a full-time Research Associate – Upstream Process Development for its Alachua, FL headquarters.

Reporting Relationship:

- The Research Assistant will report directly to the Assistant Director, Upstream Process Development.

Responsibilities:

Job responsibilities will include, but are not limited to, the following.

- Routine mammalian cell culture and maintenance in support of experimental activities
- Routine virus production activities to support production
- Support experiments for the optimization of upstream process steps in flasks and bioreactors
- Prepare media, filter trains assemblies and reagents to support experimental activities.
- Assist in process validation activities
- Collect, analyze, record, and summarize data in the course of biologics production and processing
- Assist in maintaining laboratory supplies and equipment
- Prepare and/or assist in the preparation of written and electronic materials and results
- Observe and comply with AGTC's Employee manual
- Observe and comply with AGTC's Safety and Quality manual
- Knowledge of laboratory safety, OSHA policies, and EPA standards

Requirements:

The successful candidate will meet the following requirements.

- Associate degree in biology area with 0 to 2 years of relevant experience biotech laboratory setting.
- Course work in biology, biochemistry, applicable to mammalian cell culture
- Hands-on laboratory experience in bioreactor or virology, would be plus.

AGTC offers a competitive compensation commensurate with education and experience, including salary, benefits, and company equity. AGTC is an EOE and maintains a drug-free workplace. Please send CV or resume to
